METHOD OF APPORTIONMENT OF ASSESSMENT

BENEFIT SPREAD METHODOLOGY

The total operation, maintenance and servicing cost for the landscaping, street lighting, open space and other improvements are apportioned in accordance with a methodology that is consistent with standard assessment engineering practices.

Since the assessments are levied on the owners of properties as shown on the secured property tax rolls, the final charges must be assigned by Assessor's Parcel Number. The assessments are to be spread by lot, since all lots contain single family detached homes which receive equal benefit from the improvements.

Assessment District No. PK-03-02 is comprised of 114 single family residential parcels (each defined as an Equivalent Dwelling Unit or EDU). The annual costs for the operation, maintenance and servicing of landscaping and street lighting improvements shall be apportioned to each parcel within the District in proportion to the EDU's assigned to the parcel as a percentage of the total number of EDU's assigned to all parcels within the District.

The maximum assessment rate per EDU that may be levied is set at the rates shown below. The maximum assessment rate may be increased annually each fiscal year by an amount which shall not be greater than the increase in the Consumer Price Index for all Urban Consumers for the San Francisco Area in any fiscal year for the year ending in December of the preceding year.

Maximum Assessment per EDU \$611.48/EDU

Properties become assessable ninety days after acceptance of the initial improvements by the City of Watsonville.

PART E
